PROFESSIONAL SUMMARY

Full Stack Developer with a Systems Analysis & Development degree and 15+ years of professional experience in maritime logistics at CMA CGM / Mercosul Line. I build SaaS products end-to-end — from database schema to production deploy — with strong backend focus (Java 21, Spring Boot) and modern frontend (Next.js, TypeScript). My logistics background gives me a practical business mindset: I understand workflows, SLAs, and the cost of bad software. Currently open to remote roles in Europe and North America.

TECHNICAL SKILLS

Backend: Java 21, Spring Boot 3.3, Spring Security, JWT, JPA/Hibernate, Flyway, Maven, JUnit 5, Testcontainers, RabbitMQ, Redis

Frontend: Next.js 15/16, React, TypeScript, Tailwind CSS v4, shadcn/ui, Drizzle ORM, Zustand, React Hook Form, Zod

Database: PostgreSQL, Neon, Supabase, SQL, ORM migrations (Flyway / Drizzle)

Infra: Docker, Docker Compose, Railway, Vercel, GitHub Actions CI/CD, Cloudflare DNS

Integrations: Mercado Pago (split marketplace), Stripe, Resend, VAPID push, WhatsApp (Evolution API), n8n, Gemini AI, Claude API, ViaCEP, 17TRACK

SELECTED PROJECTS

Racquet Arena · SaaS · Sports Tech · 2025 – present · racquetarena.com

Tournament management platform for beach tennis and racket sports — athletes, organizers, and arena owners in a single product.

- Java 21 + Spring Boot backend on Railway; Next.js 15 frontend on Vercel
- Rei/Rainha format (rotating doubles): individual scoring logic with automatic draw generation
- Mercado Pago OAuth split marketplace — automatic Arena fee retention per payment
- Geolocation-based tournament search (Haversine), multi-role workspace with org context switching
- Tournament publishing checklist, financial dashboard, substitutions, staff management

Jersey Control · SaaS · E-commerce · 2025 – present · jerseycontrol.com.br

Multi-instance SaaS for managing imported jersey orders. Each client gets a dedicated GitHub fork, Vercel deployment, and Neon database.

- Next.js 16, Drizzle ORM, Neon PostgreSQL, Vercel Blob, Resend email
- Full public order flow: catalog (Yupoo), cart, ViaCEP autocomplete, CPF validation, PIX proof upload
- Admin: order/batch/catalog/client/coupon management, financial dashboard with SVG charts
- WhatsApp notifications, push via VAPID, monthly Cron reports, multi-plan control via env var
- Custom oklch theming per client instance, DKIM/SPF/DMARC configured

FreightFlow API · Portfolio · LogTech · 2024 – 2025

Maritime shipment management REST API with fleet map and RBAC.

- Java 21 + Spring Boot, RabbitMQ, Redis, 100+ integration tests (JUnit 5 + Testcontainers), JaCoCo
- 4-role RBAC (ADMIN, OPERATOR, VIEWER, CLIENT), Docker Compose, GitHub Actions CI/CD
- Next.js 15 portal with react-leaflet-cluster fleet map, vessel detail drawer, carrier/status filters

CondoHub · Portfolio · PropTech · 2024 – 2025

- Java 21 + Spring Boot + React — 8-role multi-tenant condo management
- Financial module with Asaas gateway, partial payments, batch charge generation
- Assembly voting, parking lottery, work orders, full audit trail

EnglishAI · SaaS · EdTech · 2024 – present · *english-ai.com.br*

- Next.js 15, Supabase, Gemini 2.5 Flash, Stripe — A1→C1 English learning PWA
- Adaptive exercises (cloze, rewrite, scramble), AI writing coach, streak tracking, 5+ active users

WORK EXPERIENCE

Jr Software Engineer · Techspurt (Remote) · Apr 2026 – present

- Full stack development and maintenance of web applications and REST APIs
- Java, Spring Boot, PostgreSQL, React, Next.js, TypeScript, Git
- Business rule implementation, integrations, authentication, testing, and performance improvements

Customer Service Analyst · Mercosul Line · CMA CGM Group — Santos, SP · Jul 2022 – present

- Operational service for maritime and road logistics: loading, discharge, port operations across major Brazilian ports
- Portfolio of 50+ clients — booking management, extra cost analysis, daily KPI reporting with SLA focus
- Built an internal full-stack logistics tracking system (Express.js + Supabase + Firebase) adopted by the operation

EDUCATION

B.Sc. Systems Analysis & Development · Estácio de Sá — Santos, SP · Oct 2023 – Mar 2026
